Education

2008-2014

Semmelweis University

- Doctor of Medicine

Language

- Hungarian
- English
- Serbian

Experience

Angular developer

2022 - 2023

Cubix Institute of Technology | Budapest

I've wrote well-designed and efficient code by using the best software development practices.

I created Angular-based web applications, like the registration app, where the User could submit to the gym.

My instructor was an expert and professional from an industry-leading tech company.

I got a certificate at the end of the three month course.

JavaScript developer

2022 - 2023

Webuni | Budapest

I developed responsive web applications with public APIs, like weather forecast, where Users could find climate data.

I created reusable custom elements and responsive layouts.

My mentor was a quality assured by major tech institutions.

I completed a course and got a license.

Java developer

2020 - 2021

A&K Academy | Budapest

I took part in multiple software development projects that they were organizing.

I studied the concepts of algorithmic decomposition, database management, and the OOP principles.
