Experience

Angular developer   2023
Cubix Institute of Technology | Budapest

I 've wrote well-designed and efficient code by using the best software development practices.
I created Angular-based web applications, like the registration app, where the User could submit to the gym.
My instructor was an expert and professional from an industry-leading tech company.

JavaScript developer   2022 - 2023
Webuni | Budapest

I developed responsive web applications with public APIs, like weather forecast,where Users could find climate data.
I created reusable custom elements and responsive layouts.
My mentor was a quality assured by major tech institutions.

Java developer   2020 - 2021
A&K Academy | Budapest

I took part in multiple software development projects that they were organizing.
I studied the concepts of algorithmic decomposition, database management, and the OOP principles.
