Experience

Angular developer   **2023**
Cubix Institute of Technology | Budapest

I've built well-designed and efficient codes by using moduls/routing/services and authentication.
I created Angular-based web applications, like Registration app, where User could submit to the gym.
My instructor was an expert and professional from an industry-leading tech company.

JavaScript developer   **2022 - 2023**
Webuni | Budapest

I developed responsive web applications with public APIs, like Weather forecast,where Users could find climate data.
I created reusable custom elements and responsive layouts.
My mentor was a quality assured by major tech institutions.

Java developer   **2020 - 2021**
A&K Academy | Budapest

I took part in multiple software development projects that they were organizing.
I studied the concepts of algorithmic decomposition, database management, and the OOP principles.
